

Brasilia Slim Awning

Transform your deck into a cool and comfortable place, and enjoy the summer.

Price: on request

Description

Ses lignes européennes et urbaines offrent un design moderne qui met en valeur balcons et terrasses. Élégant et au design contemporain, cet auvent offre une protection solaire performante. Le BRASILIA slim est un auvent rétractable de très grande qualité offrant une protection efficace contre le soleil et contre les pluies légères.

Characteristic

The BRASILIA slim is made of extruded aluminium and high quality acrylic fabric that will last for 8 to 10 years. It comes in a manual (with hand crank) version and a motorized (with remote control) version. It is available with wall or soffit configuration. Its aluminium housing closes completely, protecting the acrylic fabric and the mechanism against all weather conditions.

The BRASILIA slim is offered in 3 projections, 8', 10' and 11'7". The width can vary from 10 to 20 feet in one-foot increments.

The structure and fabric are available in a wide variety of colors.

Advantages

All of our Acrylic Fabrics have been coated with TEFLON®. This provides protection against dirt and reinforces water repellency.

The BRASILIA slim requires very little maintenance and no additional accessories are required in the winter.
